EDUCATION

Master of Science, Civil Engineering (GPA:4.00)

Expected Graduation: Jul 2026

Oklahoma State university

Stillwater, Oklahoma

- Coursework: Open Channel Flow, Groundwater Hydrology, Data Analytics for Water Resources, GIS Applications for Water Resources, Watershed Hydrology and Water Quality

Bachelor's, Civil Engineering (GPA: 3.50)

Sep 2016

Khwopa College of Engineering, Tribhuvan University

Bhaktapur, Nepal

- Coursework: Hydraulics, Hydrology, Water Supply and Sanitary Engineering, GIS Application and Remote Sensing

PROFESSIONAL EXPERIENCE

Civil Design Coordinator, Hydroplan Engineering and Consulting

Aug 2023 – Jun 2024

- Led and mentored a multi-functional design team, ensuring timely project delivery and aiding design related queries.
- Designed and performed hydraulic analysis for hydropower and rehabilitation projects, including reservoirs, spillways, conveyance systems, and developed 3D CAD models and construction drawings that reduced design iterations and errors.

Civil Engineer, Urja Engineering and Management Solutions Pvt. Ltd.

Nov 2021 – Aug 2023

- Performed hydrology, hydraulics, and dam-break analysis using HEC-RAS to deliver detailed designs for hydropower components including dams, intakes, culverts, pipelines, tunnels, and powerhouses.
- Managed the full project lifecycle from conceptual planning and feasibility studies through quantity take off, cost estimation, final reporting, and preparation of procurement and tender documents.

Civil Engineer, NEA Engineering Company Limited

Dec 2019 – Nov 2021

- Optimized project layouts by integrating hydrology, hydraulic, and sediment analyses during conceptual planning and design phases enabling identification of the most technically and economically feasible alternative.
- Coordinated client and contractor relations to ensure effective communication and compliance, while preparing bid and procurement documents and certifying interim payment bills.

Field Engineer/Civil Engineer, Hydro Consult Engineering Limited

Oct 2016 – Dec 2019

- Delivered detailed design of hydropower components through hydrology, hydraulics, and structural analysis; produced reinforcement drawings, civil drawings, quantity takeoffs, and cost estimates for timely project completion.
- Supervised all construction activities, managed quality control/quality assurance through concrete testing and conducted surveys for layout and level verification to ensure design compliance and minimize rework.

ADDITIONAL EXPERIENCE

Graduate Research/Teaching Assistant, Oklahoma State University

Jan 2025 – Present

- Conducted literature reviews, collected and analyzed data, and synthesized findings to support research objectives on assigned topics.
- Support course delivery through grading, clarifying concepts, and assisting students with technical questions.

ACADEMIC PROJECTS

- Evaluation of National Water Model 3.0 Peak Flow Simulations at USGS Gauges in Oklahoma: Influence of Reservoir Regulation

TECHNICAL SKILLS

Design and Analysis: HEC-RAS, HEC-HMS, SWMM, HY-8, TR-55, OpenFlows HAMMER, HYTRAN, Arc GIS Pro, Revit, Civil 3D, AutoCAD, SAP2000, ETABS, SYNCHRO Pro, NavisWorks, MS Project, MS Office

Programming Language: Python, MATLAB

CERTIFICATION AND TRAINING

- Engineer-in-Training (EIT) Certification Aug 2025
- Lead4Success® Leadership Program, Center for Creative Leadership (CCL) Oct 2025
- Stormwater: Erosion and Sediment Control Oct 2025

AWARDS AND HONORS

- First Place, Poster Competition, 2026 Transportation Industry and Workforce Development Symposium, Southern Plains Transportation Center

NETWORKS AND MEMBERSHIP

- American Society of Civil Engineers
